preparation of selected steroid esters was contracted by WHO and the resulting compounds screened by the Contraceptive Development Branch (CDB) of the National Institute for Child Health and Human Development at its Biological Testing Facility. Chemically, testosterone bucyclate is Testosterone 17β-(*trans*-4-*n*-butyl) cyclohexyl carboxylate. This ester of the natural hormone, testosterone, exhibits prolonged activity when administered intramuscularly as an aqueous crystalline suspension in all species studied, including man. The drug was evaluated, including pharmacokinetics and metabolic studies in both rodents and primates, by CDB. WHO supported studies in primates as well as the first clinical studies in hypogonadal and normal men. The patent is jointly held by NIH and WHO. NIH and WHO intend to continue joint development of testosterone bucyclate.

Although each patentee may proceed with granting a non-exclusive license independently, joint licensing is envisaged. Licensing will include use of testosterone bucyclate as a hormonal method of male contraception, use for androgen replacement in other methods of male contraception, which usually compromise the endocrine as well as the gametogenic function of the testis and use as a therapeutic androgen for patients with androgen deficiency syndromes. A ''Notice of Claimed Investigational Exemption For A New Drug'' (IND) is currently being prepared.

The National Institute of Child Health and Human Development and the World Health Organization seek partners for the further development and commercialization of testosterone bucyclate.

The role of the National Institute of Child Health and Human Development and the World Health Organization is expected to be as follows:

1. Provide the commercial partner with all biological data on testosterone bucyclate covered by the agreement.

2. Provide samples of the drug and clinical dosage forms.

3. Provide chemical data on testosterone bucyclate, including routes of synthesis, analytical methods employed, purity, stability and formulation.

4. Provide reports of all safety studies of the drug.

5. Continue studies on the pharmacokinetics and biological activity of testosterone bucyclate and formulations thereof.

6. Conduct appropriate studies to optimize formulations of testosterone bucyclate.

7. Prepare the IND.

8. Participate in meetings with the Food and Drug Administration for establishment of the protocols for Phase I, II and III clinical investigations and provide liaison with the FDA.

The role of the commercial partner is expected to be as follows;

1. Obtain a commercialization license from NIH and the WHO.

2. Participate in the development of the IND.

3. Assume responsibility for regulatory affairs.

4. Assume responsibility for preparation and formulation of the drug for pre-Phase III safety studies and Phase III clinical trials.

5. Undertake such additional safety studies as may be required for Phase III clinical trials and for NDA submission.

6. Undertake an orderly sequence of clinical investigations of testosterone bucyclate as a hormonal method of male contraception and for androgen replacement in other methods of male contraception.

7. Assume responsibility for preparation and filing of the NDA.

8. Assume responsibility for commercial manufacture and distribution of the final products.

9. Ensure availability of the final products to the public sector of developing countries in sufficient quantities, at a preferential price, in accordance with WHO's public sector objectives.

Selection criteria for choosing commercial partners will furthermore include, but will not be limited to the following:

1. The proposal must contain a clear statement of capabilities and experience with respect to the tasks to be undertaken. This would include experience in drug development, regulatory affairs and marketing.

2. The proposal must contain a clear and concise outline of the work to be undertaken, a schedule of significant events, an outline of objectives to be accomplished with individual and overall times frames, and details of experimental procedures and techniques to be employed.

3. The proposal must contain the level of financial support which will be supplied for the development of testosterone bucyclate.

4. Agreement to be bound by DHHS and WHO rules and regulations regarding patent rights, the ethical treatment of animals, the involvement of human subjects in clinical investigations and the conduct of randomized clinical trials.

5. Agreement with provisions for equitable distribution of patent rights to any inventions developed under the CRADA and license agreements.

EFFECTIVE DATE: In view of the high priority for developing and commercializing testosterone bucyclate, all proposals must be received no later than September 5, 1995 for priority consideration.

ADDRESSES: CRADA proposals and questions should be addressed to Dr. Gordon Guroff, Deputy Scientific Director, National Institutes of Child Health and Human Development, Building 49, Room 5A64, Bethesda, Maryland 20892 (Telephone: 301/496–4751); with a copy to Director, UNDP/UNFPA/WHO/World Bank Special Programme of Research, Development and Research Training in Human Reproduction, World Health Organization, 20, Avenue Appia, CH–1211 Geneva 27, Switzerland. Responders interested in submitting a CRADA should simultaneously submit a license application concerning the above-mentioned patent rights to NIH and WHO for commercialization of products arising from the CRADA.

Requests for copies of the U.S. patent, license application forms, or questions about the licensing opportunity should be addressed to Ms. Carol Lavrich, Technology Licensing Specialist, Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, Maryland 20852–3804 (Telephone: 301/496–7735 ext. 287), with a copy to Office of the Legal Counsel, World Health Organization, 20 Avenue Appia, CH–1211 Geneva 27, Switzerland (Telephone: 00–41–22 7912685). Completed license applications should be submitted to the same addresses.

Pertinent information not yet publicly described can be obtained under a Confidential Disclosure Agreement with the appropriate agency.
